Inbound Logistics Names Robocom Systems International to the Top 100 List of Logistics IT Providers for 2014

Farmingdale, NY and Markham, ON, June 3, 2014. Robocom Systems International announced today that the company has been selected by Inbound Logistics as a Top 100 Logistics IT Provider.

Every year, 100 logistics IT companies are recognized by Inbound Logistics editors for their support and enablement of logistics excellence. Starting with a group of more than 400 companies, Inbound Logistics identifies the industry leaders in the group and names them to the Top 100 Logistics IT Providers list.

Felecia Stratton, Editor, Inbound Logistics said, "Increasing operational complexity caused by shifts to demand-driven logistics practices, increased collaboration, and continuing globalization, mean greater challenges for those seeking to match demand to supply. It's impressive to see Robocom Systems providing the flexibility and solutions that forward-thinking enterprises need to face supply chain challenges in 2014. For that reason, Inbound Logistics editors have recognized Robocom Systems as one of 2014's Top 100 Logistics IT Providers."

Fred Radcliffe, President of Robocom said, "It is an honor to be recognized by Inbound Logistics as a 2014 Top 100 Logistics IT Provider. We strive to enhance our customers ability to respond to the demands and changes in their supply chain by expanding our supply chain execution software offering. Inbound Logistics inclusion of Robocom as a 2014 Top 100 Logistics IT Provider confirms that our effort to deliver solutions that fit our customers' requirements and deliver maximum benefits with a rapid ROI has been recognized."

About Inbound Logistics
Since its inception in 1981, *Inbound Logistics'* educational mission is to illustrate the benefits of demand-driven logistics practices, give companies the knowledge to help them match the inbound flow of materials to their demand, and align their business process to support that shift. *Inbound Logistics* offers real-world examples and decision support to guide businesses to efficiently manage logistics, reduce and speed inventory, and offset rising transport costs, supporting business scalability across their value chain.
